 Allen Park, MI 48101

JVHL Network Facts:

JVHL was established in 1992 to offer hospital and health system outreach laboratory programs the **organization model** to attract and administer health plan laboratory services agreements, previously only awarded to commercial laboratories.

JVHL is organized as a limited liability company owned equally by several leading Michigan health care systems. Currently, there are more than 120 hospitals across Michigan, Ohio and Indiana participating in JVHL laboratory service agreements.

A **primary goal** is to provide outreach laboratory service relationships with payers to enable our network labs to provide services in support of local hospitals, healthcare systems, and physician organizations.

JVHL's **Health Plan Agreements** cover 5.4 million members for outpatient and outreach laboratory services. Network Laboratories report more than 70 million laboratory tests annually.

JVHL providers are operationally focused to provide **high-quality, convenient and cost efficient outreach laboratory services**. Our network laboratories serve more than 34,000 physician clients through more than 450 patient service centers with a combined fleet of more than 100 courier vehicles.

JVHL providers are uniquely positioned to offer **integrated clinical laboratory services** across inpatient, outpatient and physician office care settings. Contracted health plan outreach testing remains within the health system, giving physicians access to the complete clinical data set to maximize utility in the continuum of patient care.

More than 90 percent of **laboratory testing is performed locally** within the network of JVHL providers, including highly complex esoteric testing. Our affiliated laboratories have full-time pathologists to direct clinical services and assist their physician partners.

Network laboratories provide **local access for STAT and routine testing** 24 hours a day, 7 days a week. Patients have the opportunity to more conveniently utilize additional hospital services such as Pharmacy, Radiology, Mammography, Respiratory and Physical Therapy.

Network laboratories provide **personalized customer service** with consultative support from affiliated Pathologists and laboratory Professionals.

JVHL provides **comprehensive utilization and test result data** to health plans and participates actively in disease management programs and registries. Through its network labs, JVHL gathers, integrates and provides a broad range of test data, including the relationship of the test data to other care elements.

Through JVHL, network laboratories can competitively provide test services to community-based physicians that otherwise might be provided by independent labs.
